JURISDICTIONAL DETERMINATION

U.S. Army Corps of Engineers

DISTRICT OFFICE:

NEW YORK DISTRICT (CENAN)

	FILE NUMBER:	NAN-2006-3366	-WSH		
	State: County: Center coordinates of Approximate size of	New York Saratoga of site (latitude/longitude): laf f area (parcel) reviewed, incluterway: Unnamed tributary S Mohawk River	uding upla	ands: 29.25 acres.	
	JURISDICTIONAL Completed:	DETERMINATION Desktop determination Site visits	[] [X]	Date: Dates: 11-6-06	
	Jurisdictional Deter	mination (JD):			
	[] Preliminary JD - E United Stat	Based on available information	on, [] ther of the Un	re appear to be (or) [] there appear to be no "waters of the nited States" on the project site. A preliminary JD is not appealable	
	[X] Approved JD - A Check all that appl	• •	ble action	(Reference 33 CFR part 331).	
[] There are "navigable waters of the United States" (as defined by 33 CFR part 329 and associated guidance) within the reviewed area. Approximate size of jurisdictional area:					
	[X] <i>There are</i> "waters of the United States" (as defined by 33 CFR part 328 and associated guidance) within the reviewed area. Approximate size of jurisdictional area: 2.86 acres.				
[] There are "isolated, non-navigable, intra-state waters or wetlands" within the reviewed area. [] Decision supported by SWANCC/Migratory Bird Rule Information Sheet for Determination of No Jurisdiction.					
	A. Waters defined u	ICTIONAL DETERMINA inder 33 CFR part 329 as " raters that are subject to the e' be susceptible for use to tran	<mark>navigable</mark> bb and flo	e waters of the United States": ow of the tide and/or are presently used, or have been used restate or foreign commerce.	
	[] (1) The presence of interstate or force [] (2) The presence of sandflats, wetland destruction of well [] (i) which are or con [] (ii) which are or con [] (iii) which are or con [] (4) Impoundments	eign commerce, including all of interstate waters including of other waters such as intrasted, sloughs, prairie potholes which could affect interstate could be used by interstate or fish or shellfish are or could be	waters which the waters which the lakes, wet mean commerce foreign trataken and urposes by as waters	were used in the past, or may be susceptible to use in nich are subject to the ebb and flow of the tide. wetlands ¹ . rivers, streams (including intermittent streams), mudflats, dows, playa lakes, or natural ponds, the use, degradation or including any such waters (check all that apply): velers for recreational or other purposes. I sold in interstate or foreign commerce. y industries in interstate commerce. of the US.	
	[1(6) The presence of	of territorial seas.		of the US, except for those wetlands adjacent to other wetlands.	

Rationale for the Basis of Jurisdictional Determination (applies to any boxes checked above). If the jurisdictional water or wetland is not itself a navigable water of the United States, describe connection(s) to the downstream navigable waters. If B(1) or B(3) is used as the Basis of Jurisdiction, document navigability and/or interstate commerce connection (i.e., discuss site conditions, including why the waterbody is navigable and/or how the destruction of the waterbody could affect interstate or foreign commerce). If B(2, 4, 5 or 6) is used as the Basis of Jurisdiction, document the rationale used to make the determination. If B(7) is used as the Basis of Jurisdiction, document the rationale used to make adjacency determination: The waters within the wetlands drain into an unnamed tributary of Stony Creek, then into Stony Creek, which flows into the Mohawk River, which is considered a navigable waterway.

Lateral Extent of Jurisdiction: (Reference: 33 CFF	R parts 328 and 329)
Ordinary High Water Mark indicated by:	[] High Tide Line indicated by:
[] clear, natural line impressed on the bank	[] oil or seum line along shore objects

[] the presence of litter and debris [] changes in the character of soil [] destruction of terrestrial vegetation [] shelving [] other:	[] fine shell or debris deposits (foreshore) [] physical markings/characteristics [] tidal gages [] other:
[] Mean High Water Mark indicated by: [] survey to available datum; [] physical markings; [] veg	etation lines/changes in vegetation types.
[X] Wetland boundaries, as shown on the attached wetland del Chazen Companies	ineation map and/or in a delineation report prepared by: The
Basis For Not Asserting Jurisdiction: [] The reviewed area consists entirely of uplands. [] Unable to confirm the presence of waters in 33 CFR part 32 [] Headquarters declined to approve jurisdiction on the basis of the United States: [] Waste treatment systems, including treatment ponds or laterating irrigated areas, which would revert to upland to a partificial lakes and ponds created by excavating and/or directain water and which are used exclusively for such purpositive growing. [] Artificial reflecting or swimming pools or other small orned by excavating and/or diking dry land to retain water for properties of obtaining fill, sand, or gravel unless and unabandoned and the resulting body of water meets the defined 328.3(a). [] Isolated, intrastate wetland with no nexus to interstate content of the purpose of obtaining fill, as determined by the Natural Reference in the purpose of the	f 33 CFR part 328.3(a)(3). following waters present on the site are not Waters of goons, pursuant to 33 CFR part 328.3. If the irrigation ceased, king dry land to collect and oses as stock watering, irrigation, settling basins, or amental bodies of water created imarily aesthetic reasons, construction activity and pits excavated in dry land for til the construction or excavation operation is action of waters of the United States found at 33 CFR mmerce. esources Conservation Service, Explain rationale:

¹Wetlands are identified and delineated using the methods and criteria established in the Corps Wetland Delineation Manual (87 Manual) (i.e., occurrence of hydrophytic vegetation, hydric soils and wetland hydrology).

²The term "adjacent" means bordering, contiguous, or neighboring. Wetlands separated from other waters of the U.S. by man-made dikes or barriers, natural river berms, beach dunes, and the like are also adjacent.
